WOMEN FIND IT EASY TO TALK

London, Nov. 13.—Many women, vitally interested in politics, are taking lessons in public speaking in order to be ready to participate in the coming general election.

A well-known woman elocutionist, who has been teaching members of parliament and prominent men how to speak for 20 years, say that women learn to speak more easily than do men, and that the average ability to speak among the women coming to her is remarkably good.

While this professor has to cure diffidence in men, she says she has to counteract excessive boldness in many of her woman students.
